

Vinayak Sankar J

Senior Product Manager | Secure Enterprise Platforms & Developer Ecosystems

Berlin, Germany | [linkedin.com/in/vinayak-sankar-j](https://www.linkedin.com/in/vinayak-sankar-j)

PROFESSIONAL SUMMARY

Senior Product Manager with 20 years across engineering, delivery, and product, specializing in secure enterprise platforms and developer ecosystems. I lead Wire's Integrations (SDK and AI) and Core Messenger disciplines for security-, compliance-, and regulation-driven enterprises: an SDK that won 10 paying teams and iOS releases that grew iOS app downloads 24%. I validate ideas with Figma and AI-assisted prototypes before engineering commits. PMP and Agile certified, with teams of up to 100 led across onsite and remote setups.

10 new paying teams · +24% iOS app downloads · 70% survey-backed SDK roadmap · New partnerships

SELECTED PRODUCT LAUNCHES

Integrations & Apps SDK

- **10 new paying teams** – [Wire Integrations SDK](#): a new foundation for secure collaboration ecosystems; seeded a developer ecosystem building apps on Wire.
- **Developer portal** – dev.wire.com: conceived and designed the developer documentation site, defining every flow and the document structure developers need to build apps on Wire.
- **Partnership** – [SDK Apps live in production](#): brought a partner's SDK-built app into Wire.
- **70% survey-backed roadmap** – [Apps SDK for JavaScript and TypeScript](#): a customer survey showed 70% of their developers wanted TS/JS and Java/Kotlin; I drove the rollout of both SDKs.
- **5 Wire-supported apps** – [External Apps](#): 10 paying teams actively building apps, including enterprises building private apps for their own teams; apps can be shared across teams, building toward a self-sustaining ecosystem and marketplace.
- **Enterprise-grade app control** – [Apps Management, Phase 3](#): better usability and admin management of apps, a core enterprise and security requirement.

Core Messenger

- **+24% iOS app downloads** – [Multi-backend support on iOS](#): a top enterprise request; with the navigation update below, it kept top enterprise customers from churning.
- **Enterprise-requested refresh** – [iOS UI navigation improvements](#): answered repeated enterprise requests and gave the app a fresh look.
- **Long-standing gap closed** – [Preventing Adminless Groups](#): fixed a gap open since Wire's inception and raised by its most critical enterprise customers, with no compromise to security.

EXPERIENCE

Program Manager → Senior Program Manager → Senior Product Manager

04/2022 – Present

Wire GmbH, Berlin

- Own the roadmap for Integrations (team of 6) and Core Messenger (team of 10), supporting 10 major enterprise accounts in security-, compliance-, and legal/regulatory-driven sectors.
- Turn customer interviews, surveys, and market signals into prioritized requirements. A developer survey (70% wanted TS/JS and Java/Kotlin) set the SDK language roadmap.
- Conceived and designed Wire's developer documentation site (dev.wire.com), defining every flow and the document structure.
- Test ideas with users through Figma and AI-assisted prototypes before engineering commits.
- Built a working prototype of recording and transcription, with external AI integration, as an optional add-on for customers comfortable with data sharing.
- Joined the Wire Leadership Team and introduced Scrum and Kanban across teams.
- Track product metrics and feedback to drive iteration.

Project Manager → Senior Project Manager → Product Manager

06/2014 – 04/2022

EY GDS

- Set product vision for Strategy and Transactions (S&T) products across APAC and EMEA and built out the APAC Product Management portfolio: market-research products giving clients one view of company information and parent-child corporate structures for strategic decisions.

- Ran multiple concurrent projects with teams of up to 100 and budgets up to \$5M, controlling scope and cost change across the full lifecycle.
- Defined milestone criteria within product roadmaps to measure progress; presented plans and updates to key stakeholders.
- Directed agile teams using SDLC methodology; coached teams in Scrum using Jira and Azure DevOps boards.

Software Developer → Business Analyst → Technology Lead

08/2006 – 05/2014

Infosys

- Led technology projects onsite in the US for clients including Gap Inc and Aetna.
- Led technology governance: upgrade planning, hardware refreshes, and software updates.
- Elicited requirements from key business stakeholders, wrote technical requirement documentation, and aligned multiple development teams in design sessions.
- Managed offshore teams of up to 10.

SKILLS

Product: Roadmapping and strategy · Discovery and customer interviews · Prioritization · PRDs · Go-to-market and launch

AI & Prototyping: Figma · AI-assisted prototyping for demos and user testing

Delivery: Scrum, Kanban, Agile coaching · Jira, Azure DevOps · Program leadership · Budgeting up to \$5M

Leadership: Stakeholder management · Cross-functional and global team leadership · Presentations

EDUCATION

B.Tech, Electrical and Electronics Engineering – Kerala University, Trivandrum

08/2006

Infosys Software Programming Trainee – Infosys Leadership Institute, Mysore

12/2006

CERTIFICATIONS

PMP (PMI) · Certified Scrum Master (Scrum Alliance) · Disciplined Agile Scrum Master (PMI) · Scrum Fundamentals Certified
